

Committee Structure(s)	If 2, preferred choice	Comment
Local Advisory Council	Local Community Commission	I like the idea, but feel that it is extremely important that all the residents of the North Shuswap are somehow notified of the proposal. Some kind of widespread advertising seems needed, as you mentioned only 30 people responded to the survey.
Local Advisory Council	Local Community Commission	Only locals will have the north Shu in mind and work towards what is best
Local Advisory Council	Local Advisory Council	I feel the branching out of engaged members will be positive for the population and the representative, providing more channels of communication with residents about issues that need attention. Canada is frowning in bureaucracy and the last thing we need is more money spent on meetings about meetings.
Local Advisory Council	Local Community Commission	I believe local people for this would be amazing. We know what we want/need.
Local Advisory Council		We need a voice for the community and this would serve the purpose. In would be willing to volunteer to serve.
Local Advisory Council		suits me just fine.
Local Advisory Council	Local Advisory Council	Since the land in question remains unceded Indigenous Territory we're wondering where the CSRD gets its authority in the first place. Thank you for sharing this and please keep us updated.
Select Committee	Select Committee	Elections are not needed - as only those who really care about the community and have the knowledge and skills to provide good advice would likely be selected. Providing advice is not for people that win popularity contests (elections), but is best done by those who can actually have good advice to provide.
Select Committee	Local Community Commission	There has been no new athletic developments in the past 20 years that I have been on the N Shu. Firm, compulsory direction is required. But - elected members is a popularity contest that easily becomes a one issue group.
Select Committee	Local Advisory Council	There is some long outstanding community infratrure that needs serious budget planning . There needs to be a community plan drawn up and made available to the public for comment . The fire has definitely leveled the design field and the community should look at this opportunity. The forestry has a public presentation on their tenure and road upgrades when their plans are up for renewal. I have personally worked with the Ministry of Highways in suggestions of concern, for example before the past 10 year highway maintenance contracts where awarded I met with the ministry in Victoria and suggested that any contractor that would be awarded a maintenance contract had to put their employees a prejob orientation at the the contractors expense. My suggestion was implemented. I was seeing too many simple mistakes in various maintenance duties being carried out. It did correct some work procedures.
Select Committee	Select one	It seems to have more substance than LAC and less barriers than LCC
Select Committee	Select Committee	This should be a paid position paid for by the provincial govt. The tax dollars generated in our area should more than cover this .
Other		I have no idea what the difference is between the options

Other	Local Community Commission	Incorporation should be the main goal, LCC is a good first step in that direction.
Other		We need to know costs. I assume the LCC will be significant cost compared to others. I would suggest a progressive decision. Form an LAC, work with that group for one year with a decision to continue or move on to SC and do the same and move when ready to LCC . Benefit is you have knowledgeable, committed people by the time you get to LCC
Other		I spent my career as a stakeholder engagement practitioner and would suggest from a roster of local opinion leaders (informal) , issue based Task Forces are set up to deal with the issue and make recommendations to the appropriate decision body - level of government, volunteer organization etc. The key guiding principles are: openness, transparency and flexibility.
Local Community Commission		I would like the local people have a say. From what I understand with the North Shuswap fire the people had not much of a voice. Who represents the people? Dig a little deeper. Thanks for your time
Local Community Commission	Local Community Commission	I like the idea, but feel that it is extremely important that all the residents of the North Shuswap are somehow notified of the proposal. Some kind of widespread advertising seems needed, as you mentioned only 30 people responded to the survey.
Local Community Commission		There is a certain feeling of helplessness, anger and futility when decisions for our community are made exclusively by outsiders. I question whether any of them have even been on the north shore. When there is active input that has validity and teeth then I would feel we have a better chance of not just being heard, but having a concrete part of the decision process.
Local Community Commission	Local Community Commission	Only locals will have the north Shu in mind and work towards what is best
Local Community Commission	Select Committee	Elections are not needed - as only those who really care about the community and have the knowledge and skills to provide good advice would likely be selected. Providing advice is not for people that win popularity contests (elections), but is best done by those who can actually have good advice to provide.
Local Community Commission	Local Advisory Council	I feel the branching out of engaged members will be positive for the population and the representative, providing more channels of communication with residents about issues that need attention. Canada is frowning in bureaucracy and the last thing we need is more money spent on meetings about meetings.
Local Community Commission		We need a committee that can make decisions for the area. Even if it takes longer to set up it will provide provide a much stronger say in what is done in our area without the CSRD telling us what to do.
Local Community Commission		This choice gives the area more control over everything. If you are going to spend your time doing these tasks then you should have authority to change things without interference from the csrd.
Local Community Commission	Local Community Commission	I believe local people for this would be amazing. We know what we want/need.
Local Community Commission	Local Community Commission	There has been no new athletic developments in the past 20 years that I have been on the N Shu. Firm, compulsory direction is required. But - elected members is a popularity contest that easily becomes a one issue group.
Local Community Commission		LCC has authority and accountability. One concern I have is will the "appropriate people " run for election or might we risk some really right wing nutbars?

Local Community Commission		I've chosen this category for Local Community Commission as a new member of the community I believe it would provide me great opportunity to learn more about my new communities and the many viewpoints expressed by locals to help ensure that their wishes are communicated into future decisions for local programs and initiatives.
Local Community Commission	Local Community Commission	Seems like the best choice. Only a resident here for 3.5 years but it seems the general consensus is the community really wants to make choices that suit our area best.
Local Community Commission		Elected by community is best. But it was fluke I seen this so that is why you have received little feed back I'm sure.
Local Community Commission	Local Community Commission	locals know what locals need
Local Community Commission		It would be good to have more of a say on what goes on. If it helps to not have noisy businesses start up next to residential areas, that would help too. There's plenty of land here that needs to be allocated with all in mind.
Local Community Commission		I think this is the best option for our community. We need more of a say & sadly have been ignored (not by you) for far too long.
Local Community Commission		Need more voice
Local Community Commission	Local Community Commission	Incorporation should be the main goal, LCC is a good first step in that direction.
Local Community Commission	Local Community Commission	I think this is a good option for our community.
Local Community Commission		Just seems this way our voting would have a real impact and would keep us honest- if we don't vote there's no need to be upset on how things are going
Local Community Commission		I prefer the LCC due to accountability
Local Community Commission	Select Committee	need them to have discussion make authority
Local Community Commission		We must be very careful as to how this committee is selected. We certainly don't want it to be a vigilante committee
Local Community Commission		The only way to have a voice is through an elected official.
Local Community Commission		Accountability is very important for the North Shuswap although does this ad a layer of beuracacy I winder
Local Community Commission		The LCC brings decisions and accountability to North Shuswap, closer to locals. CSRD would be less "in between" locals and decisions that affect them. Elected individuals are more involved and committed than appointed volunteers, in my opinion. The LCC would demonstrate NS resolve and prepare people for possible future incorporation.

Local Community Commission		Jay- I believe true delegated authority in specific areas and recommending authority in others is very important. I am most interested in capital planning and implementation and land use planning. I have little interest in economic development and tourism. Parks is 50/50. Planning is a very big deal and needs work through the OCP.
Local Community Commission		North Shuswap has a very strong community with independent resources. The clearest path to positive growth is with autonomy.... We know our communities wants and needs all year long ! We have a large enough community to incorporate!! Sun peaks is incorporated with a smaller permanent resident count.
Local Community Commission		I want our community to have formal control and if the LCC is the most realistic step to achieving that then that is the direction I support.
Local Community Commission		Best option that lets us pick the best people we have out here to go forward and develop our communities. We'll still have to deal with the provincial government
Local Community Commission		To save \$ we could do a referendum in Oct 2026 when elections are held. But this would not allow us to elect commissioners so we'd then need an election to do that. Could we do a 2 part referendum? I.e. Do you want a LCC? If you vote "yes ", please choose "5" of the following: Person A, etc. Now would be low budget for those running as they would be running without knowing if it would pass. But I hate the cost of a referendum. What is the cost of a referendum?
Local Community Commission	Local Community Commission	We need more control over what happens on the North Shuswap. We're often dismissed and used as a cash cow for CSRD. We get a poorly funded school who parents donate so we can afford upgrades and gym equipment. Our health care clinic had to get an extra tax line for us to pay rather than CSRD contribute to. Besides snow removal and the odd pot hole repair I struggle to even find other things CSRD contributes to. The dump I guess which I'm pretty sure pays for its self with dumping fees. Oh and let's not forget their building inspection permitting and zoning of property without property owners consent which became really apparent after the fires on what people could and couldn't rebuild it was opportunistic on their behalf.
Local Community Commission		The LCC although the most work to set up, will give the community the most amount of value.
Local Community Commission		We need to move ahead asap when it comes to making decisions about what is needed in the NS. And i see the LCC is the answer for us to move ahead in getting things done here in NS
Local Community Commission		The LCC would afford us the ability to have more control as stated over our own affairs. The ultimate goal, however, has to be incorporation.
Local Community Commission	Local Community Commission	Sustainability is important. Let's not waste time and energy on forming groups and holding meetings when we are then limited in the ability to bring about real change. LCC is something I've looked into a lot and only done in one other community in BC! Why not give it a go, we are different from other communities and require a different structure of local government! I love the idea and would love to be a part of this.
Local Community Commission		We need control over our community and this is the best option in my view.

Local Community Commission		I think the area should try to get the most control over themselves as possible since we all know how little say over our district we have had in the past. I think the fire has proven that the CSRD does not value the North Shuswap or the people who live there at all.
Local Community Commission		I'm not in favour of more red tape or more layers, but I believe we need more input and if we can't fire the csrd then this is the next best thing
Local Community Commission		A lcc will have a greater impact for this region
Local Community Commission	Local Community Commission	Incorporation of Scotch Creek First
Local Community Commission	Local Community Commission	Great choice but would rather see the North Shuswap still incorporate
Local Community Commission		We definitely require a path to communicate our issues with CSRD
Local Community Commission	Local Community Commission	Why go half way. We need to have some place to go to get actions on real concerns and accountability. Elected officials means we get what we ask for..
Local Community Commission	Local Community Commission	My choice is not represented!! Being under the thumb of CSRD is the problem, as far as I am concerned! INCORPORATION is my choice!
Local Community Commission		The community needs the ability for input into development. No more storage facilities in the main roads.
